

PREMIUM TOOLS MADE IN GERMANY SINCE 1849

1583

The drill maker Jacob Heller from Schmalkalden/Thüringen in Germany is mentioned for the first time in a chronicle on being given permission to produce drill tools.

1849

In 1849 the industrial production of drill tools „made by heller“ begins in the newly-built works in Schmalkalden.

1929

Heller is the first company ever to mass-produce drill bits equipped with a carbide head.

1976

The Gebrüder Heller Dinklage GmbH is founded in Dinklage, Germany.

2014 - 2021

Serafin acquires Heller and invests multiple million Euros into the site at Dinklage. Additionally the company Keil is bought and integrated into the Heller structure. In 2021 a new distribution center follows.

2024 - Heller Tools Inc.

We are constantly improving and reinventing our company as well as our products. Quality and innovation are the driving forces that allow us to thrive after 175 years in business. As our latest achievement we are expanding our US market with our own sales team and warehouse in Ohio.
